## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 – 22 have been considered but are moot in view of the new ground(s) of rejection.

### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Reference sign 4 as shown in figure 1. Correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5 – 12, 14 and 16 – 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Salerno et al. (WO 97/09015).

With respect to claim 1, Salerno et al. (hereinafter "Salerno") discloses a sanitary napkin for placement in a crotch portion of an undergarment of a wearer (5), said sanitary napkin having a main body with a longitudinal axis, two opposite longitudinal side areas and a central region intermediate said two opposite side areas (figure 1), said sanitary napkin being characterized by a preferential bending zone on said main

body extending obliquely in relation to the longitudinal axis (50), said preferential bending zone extending from one longitudinal side area of the sanitary napkin to an opposite longitudinal side area, crossing the longitudinal axis of the sanitary napkin at the central region as set forth in figure 1.

Regarding claims 3 and 14, Salerno discloses a plurality of preferential bending zones (50) being spaced apart from one another in figure 1.

As to claims 6 and 17, Salerno discloses the preferential bending zone to be arcuate in figure 1.

With reference to claims 7 and 18, Salerno discloses a sanitary napkin (5) wherein the main body includes a fluid permeable cover layer, an absorbent system and a liquid impervious barrier as set forth on page 8, lines 3 – 25.

As to claims 8 – 9 and 19 – 20, Salerno discloses that the preferential bending zone is an embossment that may be on the fluid permeable cover layer on the absorbent system as set forth on page 17, lines 29 – 33.

Regarding claims 10 – 11 and 21 – 22, Salerno discloses that the sanitary napkin includes a fastener, in the form of a flap, for retaining the main body to an undergarment as set forth on page 18, line 31 to page 19, line 5.

As to claim 12, see the rejection of claim 1.

With reference to claim 16, Salerno discloses a sanitary napkin wherein the preferential bending zones are operative to create resistance to lateral compression when the sanitary napkin is in use as set forth on page 1, lines 6 – 16.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 – 22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 3 – 18 copending Application No. 09/375,343, over claims 1 – 14 of copending Application No. 09/374,512, and over claims 1 and 4 – 19 of copending Application No. 09/477,244.

This is a provisional obviousness-type double patenting rejection.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application, application no. 09/375,343 and application no. 09/374,512 and application no. 09/477,244 disclose a sanitary napkin adapted to be worn in a crotch portion of an undergarment comprising a fluid-pervious cover layer, an absorbent system, a liquid-impervious barrier layer, a thickness, and at least one preferential bending zone extending from one longitudinal side area of the

Art Unit: 3761

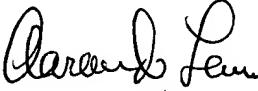

sanitary napkin to an opposite longitudinal side area, crossing the longitudinal axis of the sanitary napkin.
